2023 Ongoing Training Module; Transmission Diagnosis - Automatic Transmission DTC & Symptom Diagnosis. In this course, the discussion will include transmission diagnosis for the drivability technician to determine if the fault is a transmission issue and if so, what area is the root cause. Discussion will include methods and procedures to determine if the area of concern is mechanical, electrical or hydraulic. The goal is to determine if the repair can be made with transmission in vehicle or requires a removal or rebuild.

The trainer for this offering is Gary Machiros.
